

Voice Over

Trisha is a born mimic! She can pick up a way of speaking or dialect very quickly and place it in character in a highly convincing fashion - scary for those she lives with!!!

So - if you are after a particular style of voice for a recording of some type - advertising, announcements, radio, theatre, an event..... have a listen to these samples - and feel free to make specific requests which may be different from this small selection. OK - hands up - I am a bit 'public school' - what do they say - you can take the girl out of public school but never the public school out of the girl ?!!!!!!! So that old fashioned 'BBC' style is just up my street! But I do others - take a listen! >> What is a Lady >> The Art of walking>> How to treat a man>> Muffin the mule>> Canteen in wartime>> An old worrier>> Nursery School
